

ENVIRONMENTAL

Betafence is committed to the sustainability of the environment and make every effort to ensure the manufacturing processes, products and distribution are as environmentally friendly as possible. By working closely with both internal and external parties, the risk of pollution to the environment can be reduced and the environment sustained.

Commitment

Betafence commits to:

- Protecting the environment
- Fulfilling all its compliance obligations
- Providing a framework for continual improvement of its environmental performance

Process

In order to achieve this Betafence seeks to:

- Comply with the applicable laws, legislation and any interested parties' obligations
- Minimise waste by evaluating its operations and ensuring they are as efficient as possible
- Use raw materials and energy resources rationally and monitor the usage of water, energy and waste
- Conduct monitoring of external emissions to air and discharges of treated water to sewer
- Take environmental implications into consideration when making strategic business decisions
- Take any necessary precautions to prevent any soil, ground or groundwater contamination
- Ensure the policy is available to both internal and external interested parties and they understand their responsibilities
- Regularly inform employees of their responsibilities and train them on environmental matters
- Set objectives and targets for improvement and provide the necessary resources to achieve these
